

# System 3000

 [synton.nl/system-3000](http://synton.nl/system-3000)

Eurorack modular in 1980 by Synton

Synton 3000

This system is owned by Marc Paping. It can be used as a four-voice synth. It includes: Eight 3021 VCOs, four 3005 EGs, four 3010 EG's, four 3017 VCFs, four 3224 dual VCFs six 3209 dual VCAs and a total of fourteen 3015 and 3016 mixer modules. There is also a variety of LFOs, NRGs, I/O amps, sample & holds and gate processors.

Our experience with this system has helped us design the Fenix as a compact, flexible synth that has attenuators and mixers integrated into many of its modules. The Interface module contains a power supply, 3 jack sockets, which can be used for input and outputs and a keyboard interface.

Midi interface added to the power supply. System belong to Daniel Freund. Midi modification is done by Sebastian Niessen.

---

3000 system with keyboard and Bob Moogs Touch plate

There were about 25 modules available. The latest 5 modules like PPG are produced in small numbers. See below for a list from 1984 with the original Dutch retail prices.
